GIPI LE SEDIE

Passione, dedizione ed amore per il proprio lavoro e per le cose belle e funzionali sono alla base del nostro impegno quotidiano. Sviluppiamo processi ponendo massima attenzione alla loro impronta ecologica, minimizzando l'impatto sulle risorse ambientali impiegate e concependo prodotti che hanno a cuore il benessere delle persone.

Le nostre proposte scaturiscono da una costante ricerca su materiali e finiture, attenti ad ascoltare le esigenze dei clienti. Creiamo concetti di arredo che si tramutano in nuove soluzioni per vivere piacevoli emozioni all'interno dello spazio conviviale contemporaneo delle nostre case.

Sappiamo di poter offrire innumerevoli combinazioni di colori e materiali per rendere straordinariamente unico ogni nostro prodotto per la casa. Ogni dettaglio è concepito per trasformare l'idea creativa in un oggetto funzionale in grado di durare a lungo nel tempo, i nostri prodotti, tavoli, consolle, sedie e poltrone, attraversano indenni il trascorrere degli anni e resistono alle sollecitazioni del continuo utilizzo.

In ogni particolare e finitura tutta l'esperienza di chi da oltre 30 anni immagina e realizza complementi d'arredo con inconfondibile stile e passione per il proprio lavoro. Questo è il nostro mondo e questo è il nostro modo di progettare articoli che arredino e rendano piacevole, conviviale ed accogliente le nostre case.

Dal 1984 l'eccellenza e l'affidabilità di GIPI LE SEDIE, questi siamo noi.

Passion, dedication and love for one's work and for beautiful and functional things are at the base of our daily commitment. We develop processes paying maximum attention to their ecological footprint, minimizing the impact on environmental resources used and conceiving products that care about people's well-being.

Our proposals stem from a constant research on materials and finishes, attentive to listening to customer needs. We create furniture concepts that turn into new solutions to live pleasant emotions within the contemporary convivial space of our homes.

We know we can offer countless combinations of colors and materials to make each of our products for the home extraordinarily unique. Every detail is conceived to transform the creative idea into a functional object able to last for a long time, our products, tables, consoles, chairs and armchairs, pass unscathed over the years and resist the stress of continuous use.

In every detail and finish all the experience of those who for over 30 years imagines and creates furnishing accessories with unmistakable style and passion for their work. This is our world and this is our way of designing items that furnish and make our homes pleasant, convivial and welcoming.

Since 1984 the excellence and reliability of GIPI LE SEDIE, these are us.

GAMMA COLORI COLORS RANGE

La nostra gamma colori di serie è da sempre molto vasta, aggiornata periodicamente con i colori di tendenza dell'arredamento contemporaneo; siamo inoltre in grado di personalizzare i nostri prodotti in accordo con le vostre esigenze di colore a campione sia su scala RAL che da campione fisico (ci riserviamo sempre tuttavia di valutare caso per caso).

Our range of standard colors has always been very wide, updated periodically with the trendy colors of contemporary furnishings; we are also able to customize our products according to your needs color to sample both on a RAL that physical sample (we reserve however always to evaluate the feasibility case by case).

TESSUTO DEL CLIENTE CUSTOMER'S FABRICS

Anche il nostro campionario tessuti è abbastanza nutrito, tuttavia il nostro orientamento al servizio prevede la possibilità di confezionare la tappezzeria di alcuni nostri prodotti con il tessuto fornito dall'acquirente. Vogliate sempre chiedere preventivamente la possibilità di realizzare ciò di cui avete bisogno.

Even our tissue samples is quite large, however our service orientation also provides the ability to package upholstery of some of our products with the fabric supplied by the purchaser (Please, always ask in advance the possibility of realizing what you need).

TINTE ALL'ACQUA WATER COLORS

Le tinte che usiamo per colorare i nostri prodotti, sedie e tavoli, nei colori legno del nostro campionario sono da sempre a base di acqua, resina e pigmento (colore), l'utilizzo di questi prodotti piuttosto che altri garantisce una maggiore naturalità del colore ottenuto, una alta penetrazione nel supporto (il legno) quindi maggiore stabilità di colore anche in caso di urto o graffio. Inoltre riscontriamo quanto segue: "Le vernici ad acqua sono conosciute anche come idrosolubili e a basso impatto ambientale. Il loro sviluppo è la conseguenza di una sempre maggior attenzione all'ambiente da parte di aziende e consumatori. Usando vernici ad acqua si riduce infatti del 95% l'emissione nell'ambiente di COV (Composti Organici Volatili) rispetto all'utilizzo di vernici a solvente. Inoltre le vernici ad acqua sono inodori, non infiammabili e a bassa tossicità."

The colors we use to color our products, chairs and tables, in the colors of our wood samples are always water-based, resin and pigment (color), the use of these products rather than other provides more natural color obtained, a high penetration into the substrate (the wood) and then increased color stability even in case of impact or scratch. In addition we find the following: "The water-based paints are also known as water-soluble and environmentally. Their development is the consequence of an increasing focus on the environment by businesses and consumers. By using water-based paints can shorten the 95 % the environmental release of VOCs (Volatile Organic Compounds) than using solvent based coatings. In addition, the water-based paints are odorless, non-flammable and low toxicity."

VERNICIATURA A POLVERE EPOSSIDICA EPOXY POWDER-COATED

La maggior parte (ove indicato) dei nostri prodotti in metallo viene verniciata a polvere epossidica, metodo molto valido per preservare efficacemente il manufatto e l'ambiente; il presente procedimento presenta le seguenti caratteristiche e vantaggi: "La verniciatura a polveri è un procedimento di rivestimento di superfici metalliche con un film organico, effettuato a scopo decorativo e/o di protezione dalla corrosione e da agenti aggressivi. I pezzi in lavorazione vengono ricoperti di polvere verniciante a base di resine sintetiche, che aderisce per effetto elettrostatico, e poi passati in un forno dove a causa della temperatura la vernice prima fonde e poi polimerizza dando uno strato aderente. Il risultato in termini di aderenza, durata e resistenza alla corrosione è molto elevato. In effetti lo spessore dello strato verniciante ottenibile con questa tecnologia è nettamente superiore a quello ottenibile con vernice liquida (si superano agevolmente i 100 micrometri) e le caratteristiche meccaniche (durezza, elasticità) possono essere molto elevate. Con la verniciatura a polvere (anche chiamata plastificazione) si possono comunque ottenere ottime prestazioni sia a livello di finitura, che di tenuta meccanica. Trova una vasta applicazione a livello industriale, in quanto dal punto di vista qualitativo è di facile applicazione e dal punto di vista ecologico e dell'ambiente di lavoro elimina il problema dei solventi, ma dato il procedimento necessario per il cambio del colore, la produzione viene normalmente eseguita a grandi lotti colore."

Most (if indicated) of our metal products are epoxy powder coated, very good method to effectively preserve the artifact and the environment; the present method has the following features and benefits: "The powder coating is a process for coating metal surfaces with an organic film, made for decorative purposes and / or protection from corrosion and aggressive agents. The workpieces are covered of powder coating based on synthetic resins, which adheres by electrostatic effect, and then passed into an oven where due to the temperature before the paint melts and then cures giving an adherent layer. The result in terms of adhesion, durability and resistance to corrosion is very high. In fact the thickness of the coating obtained with this technology is clearly superior to that obtained with liquid paint (it easily exceed 100 micrometers) and mechanical characteristics (hardness, elasticity) can be very high, with the coating powder (also called lamination) can still get excellent performance both in terms of finish, that of the mechanical seal. Find a wide industrial application, since from the point of view of quality and is easy to apply from the ecological point of view of the working environment and eliminates the problem of the solvent, but since the processing needed for the change of color, the production is normally performed in large batches color."

VERNICIATURA ACRILICA ACRYLIC PAINTS

La finitura ACRILICA viene utilizzata su tutti i nostri migliori prodotti in legno.

"Le vernici acriliche possiedono nei confronti delle vernici a base di resine sintetiche molti vantaggi tra i quali per esempio:

- Migliori caratteristiche meccaniche quali la resistenza ai graffi, la durezza della superficie verniciata, l'elasticità.
- Più resistente ai detergenti e agli agenti atmosferici.
- Migliore protezione contro gli agenti corrosivi in combinazione con il fondo applicato.
- Nessuno scolorimento naturale della base legante
- Migliore resistenza contro l'ingiallimento.
- Riverniciabile con lo stesso tipo di vernice in ogni momento (la vernice sintetica solamente entro 2 ore oppure dopo 24 ore).
- Dopo l'essiccazione in profondità riverniciabile con altri tipi di vernice (Le vernici sintetiche si staccano).
- Essiccazione molto più rapida (fuori polvere in 10 minuti invece che in 30 minuti, al tatto in 15 invece che in 180 minuti)."

The finish ACRYLIC is used on all our best wood products.

"Acrylic paints have towards the paints based on synthetic resins many advantages including for example:

- *Improved mechanical properties such as resistance to scratches, the hardness of the coated surface, the elasticity.*
- *More resistant to detergents and weathering.*
- *Better protection against corrosive agents in combination with the fund applied.*
- *No discoloration of the natural base binder.*
- *Improved resistance against yellowing.*
- *Overcoated with the same type of paint at all times (the synthetic paint only within 2 hours or after 24 hours).*
- *After drying deep recoated with other types of paint (the synthetic paints come off).*
- *Much more rapid drying (dust free in 10 minutes instead of 30 minutes, to the touch in 15 instead of 180 minutes)."*

TAVOLI ALLUNGABILI EXTENDABLE TABLES

I tavoli allungabili e super-allungabili sono nel nostro DNA, li costruiamo da sempre, le Vostre esigenze sono la nostra ispirazione. La maggior parte dei nostri tavoli utilizzano meccanismi di allungo di ultima generazione, leggeri, scorrevoli, molto robusti e affidabili; i meccanismi adottati sono frutto della nostra ricerca e sperimentazione, vengono costruiti secondo i nostri dettami, interamente in alluminio anodizzato o acciaio e alluminio, sono bloccabili in ogni posizione, sincronizzati e estremamente robusti e affidabili; abbiamo i nostri tavoli allungabili nelle case di tanti clienti da oltre venti anni - provate a domandare!

The extendable tables and super-extendable are in our DNA, we construct them from always, your needs are our inspiration. Most of our dining tables using mechanisms of extension of the latest generation, light, sliding, very robust and reliable; the mechanisms adopted are the result of our research and experimentation, are built according to our dictates, are constructed entirely in anodized aluminum or steel and aluminum, are lockable in any position, synchronized and extremely robust and reliable; we have our extendable tables in the homes of many customers for over twenty years - try to ask!

VETRO ANTIMPRONTA ANTI-FINGERPRINT GLASS

I nostri tavoli, ove previsto, possono adottare il piano in vetro antimpronta, il trattamento superficiale adottato rende la superficie perfettamente liscia al tatto è altamente resistente alle impronte e di facile pulizia. Queste prestazioni sono frutto di uno speciale procedimento produttivo di incisione chimica del vetro piano, il vetro risulta setoso e più caldo al tatto, opaco alla vista e soprattutto ANTIMPRONTA.

Our tables, where feasible, can use the glass anti-fingerprint. Surface treatment adopted makes the surface perfectly smooth to the touch is highly resistant to fingerprints and easy to clean. This performance is the result of a special production process of chemical etching of glass. The glass is more silky and warm to the touch, opaque to the eye and especially FINGERPRINT.

PUNTI DI FORZA STRENGTHS

LAMINATO ANTIGRAFFIO LAMINATE ANTI-SCRATCH

Da molto tempo utilizziamo il laminato per confezionare i piani dei nostri tavoli, materiale in cui crediamo per la comprovata robustezza e affidabilità nel tempo, di recente a seguito dell'evoluzione che questi materiali hanno avuto abbiamo adottato dei laminati con una ulteriore maggiore resistenza ai graffi che trovate nei nostri migliori modelli.

For a long time we use the laminate for packaging the plans of our tables, material in which we believe for the proven robustness and reliability in time, recently as a result of the evolution that these materials have had, we adopted the laminates with a further higher resistance to scratches that you find in our best models.
